

## SAMUEL SHADIVA

### Full Stack Software & AI Engineer (Flutter / Python)

Nairobi, Kenya | +254 791 050 491 | shadivasam@gmail.com

[LinkedIn](#) | [GitHub](#)

### PROFESSIONAL SUMMARY

Innovative Software Engineer specializing in Mobile Development (Flutter/Dart), Backend Architecture (Django/PostgreSQL), and AI Systems. Proven track record of taking products from concept to production, with multiple apps live on the Google Play Store (including *Stratum* and *Number Your Days*). Highly skilled in building autonomous AI agents that automate complex workflows—such as B2B lead generation and job matching—by integrating LLMs, search APIs, and database logic. Passionate about solving real-world problems through clean architecture, token-optimized AI, and scalable mobile interfaces. Strong technical communicator with experience training developers in AI integration and mobile frameworks.

### TECHNICAL SKILLS

- **Mobile Development:** Flutter, Dart, Kotlin (Foundational), Android SDK, Firebase, State Management (Provider/Bloc/MVVM).
- **AI & Automation:** Autonomous AI Agents, LLM Integration, Prompt Engineering, Token Optimization, Serper.dev API, TheirStack API, RSS parsing.
- **Backend & Databases:** Python, Django, Django REST Framework, PostgreSQL, Cloud Firestore, SQLite/Drift, Hive.
- **Tools & Concepts:** REST APIs, Git, Google Maps API, Computer Vision API integration, CI/CD, Agile.

### KEY PROJECTS & AI SYSTEMS

#### Autonomous AI Agents: "Atlas" & B2B Lead Gen

*Tech Stack: Python, PostgreSQL, Serper API, TheirStack, LLMs*

- **"Atlas" Automated Job Search System:** Engineered an autonomous AI agent that ingests job postings via RSS feeds and TheirStack, evaluates them against a PostgreSQL database of my technical skills, and scores suitability on a 1-10 scale.
- **Workflow Automation & Token Optimization:** Implemented conditional logic where scores >9 trigger auto-applications, >7 generate tailored draft applications, and <7 are ignored, strictly optimizing API token usage and computing costs.
- **B2B Sales Agent:** Developed an outbound lead generation agent using Serper.dev to discover companies lacking modern fleet management. The agent analyzes company profiles and autonomously drafts highly personalized sales emails pitching my proprietary Fuel & Repair Order Management System.

#### Stratum (Live on Google Play Store)

*Tech Stack: Flutter, Dart, Hive, Generative AI*

- [View Stratum on Play Store](#)
- **Automated Data Engine:** Engineered a secure, local SMS parsing engine that automatically extracts and logs financial transactions without manual data entry, utilizing a robust offline **Hive** database architecture.
- **AI-Powered Categorization:** Integrated Google's Generative AI to dynamically clean messy merchant names and intelligently auto-categorize expenses, providing users with accurate, zero-friction financial analytics.
- **Financial Dashboards:** Developed real-time tracking for dynamic budgets and goal-oriented digital piggybanks, allowing users to monitor their "Free Cash" and control spending proactively.

### Number Your Days App (Live on Play Store)

*Tech Stack: Flutter, Firebase, AI Integration*

- [View Number Your Days on Play Store](#)
- **AI-Powered Journaling:** Designed and deployed an advanced journaling application utilizing AI endpoints to analyze user text entries for sentiment and psychological patterns.
- **Cloud Infrastructure:** Implemented secure cloud syncing via Firebase Firestore and robust user authentication.

## PROFESSIONAL EXPERIENCE

### Mobile & Backend Developer | IVY Community

*Jan 2025 – Nov 2025*

- **Vendor Management System:** Architected a comprehensive cross-platform system using Flutter and Django, enabling real-time inventory tracking for local vendors.
- **Computer Vision API:** Developed a custom Measurement API to extract user body metrics (shoulder width, waist, height) from 2D photos for a virtual "Fashion System."
- **3D Integration:** Led R&D initiatives on 3D body modeling, prototyping integration with SMPLX to create rotatable 3D user avatars for virtual outfit fitting.

### Lead Technical Instructor (AI & Mobile) | Independent Training Workshops

*Sep 2025 & Feb 2026*

- **Curriculum Delivery:** Designed and conducted intensive technical training sessions focused on Mobile App Development (Kotlin) and Applied Artificial Intelligence.
- **AI Integration:** Mentored developers through hands-on workshops on how to practically integrate AI LLM endpoints into mobile applications to solve real-world problems.

- **Technical Communication:** Demonstrated the ability to break down complex software engineering and machine learning concepts into digestible, actionable lessons for peers.

**Backend Developer** | Uasin Gishu County Government

*May 2023 – Aug 2023*

- **Process Digitization:** Spearheaded the development of the Fuel and Repair Order Management System, replacing a manual paper requisition process and drastically reducing turnaround times.
- **API & Database Management:** Implemented Google Maps API to calculate precise distances for fuel quotas, directly mitigating fuel theft. Managed the PostgreSQL schema handling complex departmental relations.

**EDUCATION**

**Master of Science: Information Technology**

*Strathmore University | May 2025 – Expected Jun 2027*

**Bachelor of Science: Computer Science**

*The Catholic University of Eastern Africa | Sep 2020 – Oct 2024*

- **GPA:** Second Class Upper Division
